

Weekly Report

09/28/2015 - 10/11/2015

Jing XIA

October 11, 2015

1 Summary

This week I mainly focus on the DataScanner project.

2 Projects

2.1 Project 1 - DataScanner

- I've integrated the NetEase game data into the system. Case to be studied.
- The summary rack which summarizes user-defined view sets has been fully implemented.
- A new color style and icons are applied to the overall interface.
- Fixed other minor bugs.
- A short demo video has been recorded and uploaded to the paper SVN archive.

2.2 Project 2 - NBA Game

We've started the NBA game project. Sidong Wang has taken over the codes from Tianyi Lao. We plan to extract time information from video with OCR open source APIs. Lao has designed the switch icon, the shot-miss icon and the score box. Those designs still require further polishing.

3 Paper Reading and Miscellaneous
